

JAIDEEP SINGH

Lucknow, India | 8795665137 | [Gmail](#) | [LinkedIn](#) | [Github](#)

PROFESSIONAL SUMMARY

B.Tech Computer Science graduate skilled in Python, SQL, Machine Learning, Data Analysis, AWS Cloud Services, and Web Development. Hands-on experience with Flask, NLP, and data visualization tools through academic projects and training. Seeking an entry-level Software Developer, Data Analyst, AI/ML, or Cloud Engineer role..

EDUCATION

Babu Banarasi Das University, Lucknow 2022 – 2026
B.Tech in Computer Science & Engineering

Kendriya Vidyalaya, Aliganj, Lucknow 2021 – 2022
Intermediate (Class XII)

Kendriya Vidyalaya, Aliganj, Lucknow 2019 – 2020
High School (Class X)

TECHNICAL SKILLS

Languages: Python, SQL, HTML5, CSS3

Data Science & AI: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, EDA

NLP: NLTK, text preprocessing, feature extraction

Cloud: AWS (EC2, S3, IAM), Cloud Architecture, Deployment Models

Testing & Automation: Pytest, Manual & Automated Software Testing

Tools & Platforms: Git, GitHub, VS Code, Jupyter, Spyder, Streamlit, Render Model

Hub: Hugging Face

INTERNSHIP/TRAINING

GRAS tech – AWS Cloud Computing Summer Training June 2025 – July 2025

- Gained practical knowledge of Amazon Web Services including EC2, S3, and IAM
- Studied cloud architecture principles: virtualization, security, and deployment models
- Completed project-based training with real-time use cases on AWS infrastructure

PROJECTS

Netflix Data Analysis

Python | Pandas | NumPy | Matplotlib | Seaborn

- Performed exploratory data analysis on the Netflix Movies and TV Shows dataset to identify trends in content type, genres, ratings, and release years
 - Cleaned, processed, and analyzed large datasets using Pandas and NumPy
 - Visualized business insights and patterns using Matplotlib and Seaborn
- Tech Stack:** Python, Pandas, NumPy, Matplotlib, Seaborn

Alexa Review Sentiment Analysis

Python | Scikit-learn | NLTK | Streamlit

- Built an end-to-end NLP and Machine Learning application to classify Amazon Alexa reviews as Positive or Negative
- Implemented text preprocessing and feature extraction pipelines using NLTK and Scikit-learn
- Deployed a real-time sentiment prediction web application using Streamlit **Tech Stack:** Python, Scikit-learn, NLTK, Streamlit

CLARIFAI – AI-Powered Customer Support Chatbot

Python | Flask | LangChain | FAISS | NLP | RAG

- Developed an AI-powered customer support chatbot using Python, NLP, RAG, and vector databases to automate query resolution.
- Implemented semantic search and sentiment analysis using LangChain and FAISS/Pinecone for context-aware responses.
- Built REST APIs with Flask and integrated a responsive web interface for real-time interactions.
- Achieved 92% response accuracy with an average response time of 2 seconds and support for 100+ concurrent users.

Tech Stack: Python, Flask, LangChain, NLP, RAG, Transformers, FAISS/Pinecone, HTML, CSS, JavaScript, Git

CyberShield AI

Python | Flask | Scikit-learn | JavaScript | Chrome Extension APIs

Developed CyberShield AI, a Machine Learning-based phishing URL detection system using Python, Flask, and Scikitlearn.

- Implemented URL feature extraction and classification to identify phishing and legitimate websites.
- Built a Flask-based backend API for real-time threat analysis and confidence-based predictions.
- Developed a Chrome Extension to enable browser-based website scanning and phishing detection.
- Applied cybersecurity and web security concepts to automate malicious URL identification and improve user protection.

Tech Stack: Python, Flask, Scikit-learn, Pandas, NumPy, Machine Learning, Feature Engineering, JavaScript, Chrome Extension APIs, Git.

CERTIFICATIONS

- Python Programming – IBM Career Education Program
- Cloud Application Developer – IBM Career Education Program
